

ANTI-SLIP CHEMICAL TREATMENT

We provide top-tier **anti-slip chemical treatments**, to ceramic and porcelain tiles. Our high-performance solutions significantly enhance slip resistance, ensuring optimal safety across commercial and residential environments.

ANTI-SLIP CHEMICAL TREATMENTS - NOT A COATING:

- P**  Prevents hydroplaning and allows efficient water disbursement
- P**  Permanent etching into the tile surface
- Z**  Zero downtime as treatment is immediate and long-lasting
- N**  No need to replace the existing tiles
- R**  Reduces the risk of injury, medical bills, insurance claims, and lawsuits
- N**  Non-toxic and environmentally friendly
- W**  Works only on man-made tiles with a glazed finish such as ceramic, porcelain, and glazed tiles that are slippery when wet

BEFORE TREATMENT

AFTER TREATMENT

Our advanced surface technology transforms wet, hazardous tiles into **safe, high-traction environments** without altering their appearance.

MATERIAL COMPATIBILITY

This specialized treatment is engineered exclusively for man-made, glazed mineral surfaces that become slippery when wet, including:

CERAMIC

PORCELAIN
